2022 Toyota RAV4 Loss In Value Case Study

Tuesday, January 31, 2022

The 2022 Toyota RAV4 is a practical and efficient option worth considering. The entry-level model may be relatively inexpensive but also has basic features. Those looking for more can step up to mid-range trims, including a 2.5-liter four-cylinder engine, eight-speed automatic transmission, front-wheel drive, and a range of driver assistance tech including adaptive cruise control. If luxury is what you're after, higher trims come with heated seats, faux leather upholstery, and a JBL stereo system. Front-wheel-drive RAV4s can achieve up to 35 mpg on the highway, earning class-competitive fuel-economy estimates from the EPA.

Inside the RAV4, ergonomics and cubby storage take priority. A vast shelf crosses the dash and compliments a large center console excellently. It boasted soft-touch panels contrasted nicely with nice plastics. The minimalistic LE trim features cloth upholstery, a plastic wheel, and single-zone manual climate control. With the next-level XLE, Toyota has added some amenities, whereas for the XLE Premium - we can enjoy faux-leather seating, a leather-wrapped wheel, and a shift knob as well as a dashboard and armrest wrapped in material with stitching for extra cushioning. When it comes to stowing the rear seats, you will find this to be an easy operation as they fold down flat for bigger cargo spaces.

Loss In Value Example

Was Your 2022 Toyota RAV4 in an Accident?

You were on a regular day and had a car accident. Did you know that a wrecked and repaired car can lose \$8,135 or more in value?

Diminished Value Calculator	
Before Accident Cash Value	\$40,650
