[Different Operational Vehicles by Different Automakers in the U.S.](#)

Wednesday, June 30, 2021

The automotive industry is one of the top industries in the world, and there are several automakers in the United States that sell operational vehicles throughout the country. According to the [Made in America Auto Index](#), 65% of the vehicles inside the US are manufactured in the country itself. Car ownership is a major concept among Americans, which is why there has been a major increase in the purchase of cars in the United States.

This article takes you through different operational vehicles that are manufactured by various automakers in the US.

Major Operational Vehicles by US Car Manufacturers

US car manufacturers and automakers can be divided into two different categories: legacy manufacturers that originate from the US and foreign manufacturers who have operations in the country. With that said, let's have a look at the top ones, as well as their most popular vehicles.

General Motors

General Motors is one of the top US car manufacturing companies that was founded in 1908 and it actually has consolidated numerous car companies, such as Buick, Cadillac, Chevrolet, and GMC. The company produces various kinds of cars, electric vehicles, SUVs, trucks, and commercial vehicles.

The Chevrolet brand features a wide range of models, whereas Cadillac offers luxury vehicles. If you are looking for larger vehicles, you can check out their range of GMC and Buick.

Some of the popular models by GM include:

- Chevrolet Spark
- Chevrolet Corvette
- Cadillac Escalade
- Cadillac CT4
- GMC Canyon

Ford Motor Company

Ford Motor Company is one of the most popular car manufacturers in the United States, and it sells more vehicles than most of the other automakers. With its headquarters in Michigan, the company was started by Henry Ford in 1903, and offers a major range of cars, SUVs, trucks, and many others. Even if you know nothing about cars, you would know about the popular Ford Mustang. Other than that, the popular Ford models include:

- Ford Fusion
- Ford Escape
- Ford Ranger
- Ford Explorer
- Ford Mustang Mach-E

Toyota Motor Corporation

The Toyota Motor Corporation is headquartered in Tokyo, Japan, and it practically needs no introduction. It is one of the best-selling brands in the world, including the US. They have a wide range of sedans, SUVs, trucks, and also electric cars. Although there is no car more popular than the Toyota Corolla, their Prius is also hugely popular, which is a hybrid between gasoline and electric. Some of the popular Toyota models include:

- Toyota Camry
- Toyota CH-R
- Toyota RAV4
- Toyota Land Cruiser
- Toyota Tundra

Honda Motor Company

Next up on our list is the Honda Motor Company, which is just as popular as the others in the United States. Just like Toyota, this company is also headquartered in Japan and has major operations in the US. Apart from their sedans, SUVs, vans, and trucks, they also have a line of fuel cell electric vehicles that you can choose from. Some of the popular vehicles by Honda include:

- Honda Civic
- Honda Accord
- Honda Insight
- Honda CR-V
- Honda CR-V Hybrid

Apart from these popular automakers in the US, you can also find a wide range of other companies like Hyundai Kia Auto Group, Nissan Motor Corporation, Subaru Corporation, Volkswagen Group, and many others. As technology evolves, there is no telling what the future of operational vehicles would look like.
